HIGH SPEED VERTICAL CARTONER FROM Z AUTOMATION RUNS THEATER BOXES AND MORE

ARLINGTON HEIGHTS, IL – A new generation of Vertical Cartoners is now available from Z Automation Company (ZAC), premier manufacturer of horizontal and vertical cartoners and other secondary automation systems. Model CV6-350C is a continuous motion cartoner that features a streamlined, modular design; patented Dynamic Carton Cell Chain; Volumetric Filler; and integrated Vision System.

Ideal for the food, confectionery, and nutraceutical applications, the cartoner will load a variety of carton sizes and styles, including theater boxes. With a 4-spindle rotary carton feeder, Model CV6-350C is designed to run cartons at a rate up to 350 cartons per minute.

Thanks to ZAC's patented technology and other key features, the Vertical

Cartoner maximizes productivity and offers impressive benefits, including:

- Patented product streaming delivery system (Patent No. 7.497.084) – increases production and uptime, eliminates bridging and clogging;
- Volumetric fillers feature automatic adjustment via feedback from the integrated checkweigher, resulting in less product waste;

- Patented Dynamic Carton Cell Chain (Patent No. 6.912.826) – provides perfect carton squaring, no scuffing, runs theater boxes with ease;
- Quick, tool-less changeovers and recipe-driven flexible system can run a wide range of carton sizes with no change parts.

Z Automation’s cartoning equipment includes Vertical Cartoners with volumetric fillers or integrated scale systems, as well as Horizontal Cartoners and Slevvers. In addition, the company offers an extensive line of Tray Packers, Case Packers, Robotic solutions and Palletizers, line integration and validation packages. Z Automation’s innovative solutions provide numerous benefits to the Food and Beverage, Pharmaceutical, Medical Device, and Personal Care markets, including:

- Flexibility - Modular designed systems, quick tool-less changeovers and no changeover parts;
- Multi-Configured Product Stacking – exclusive product stacking feature and the industry’s fastest blister loading infeed system;
- Patented Product Streaming Technology;
- Patented Dynamic Carton Cell Chain, provides perfect carton squaring, eliminates change parts, and offers “Jam free” loading;
- cGMP designs; and
- High-speed Slewing.
